'GI-Pedagogy' Innovative Pedagogies for Teaching with GIS

Mon 7th November22
4 – 5pm

Innovative Pedagogies for Teaching with GIS

Contents

- About the project
- Innovative **Pedagogical model** for **Teaching with GIS**
- **Toolkit** of innovative pedagogical approaches
- Teacher training **course**
- **Case studies** and a digital exhibition of the findings

Creating Vignettes / case studies

Gi Pedagogy: Concept Cube

S in GIS stands for **system**.

S in our model can also stand for **steps** of course and also **scaffolding**.

S can also stand for **schema / schemata**: the interconnected blocks of knowledge which are acquired at each level.

S is also about **solutions** to problems which GIS can help to produce.

And finally, the S can stand for the **stories** which are told using GIS: the narratives developed by teachers and learners.

Also S = **sustainability**

Our final thinking can be represented by this diagram:

2019-1-UK01-KA203-061576

You will notice the  between each step - these represent opportunities for **checking understanding** before moving up, and also the opportunity to slide back down if required. Steps may also be missed out by groups who may have already acquired schema, but may also be visited several times during a lesson sequence.

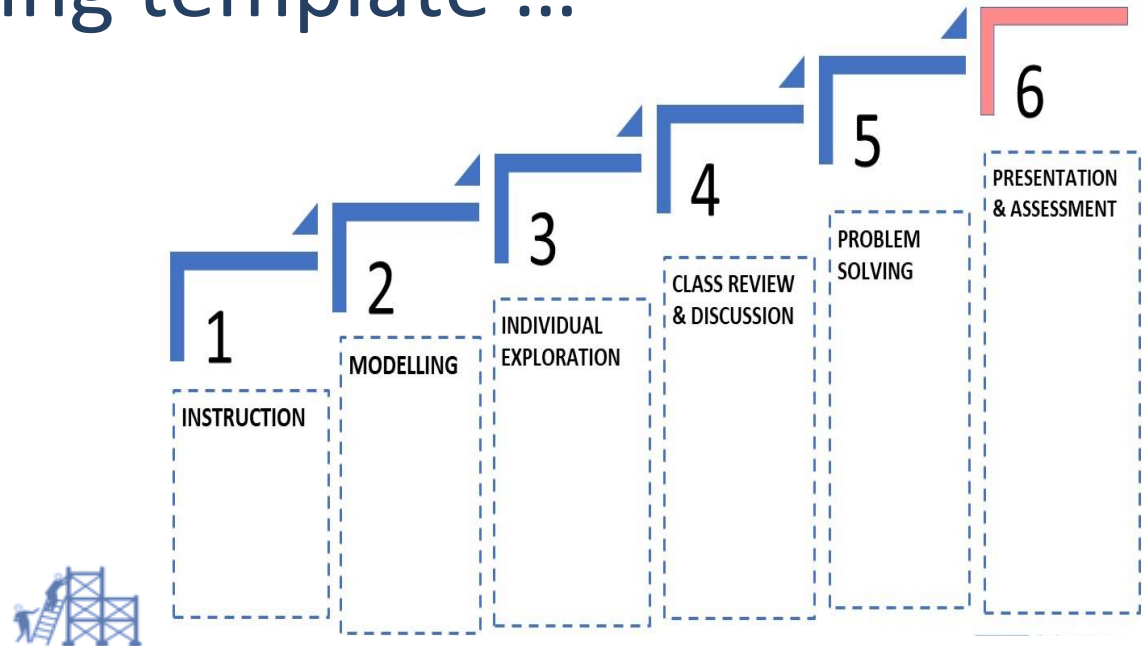

Creating template ...

Rosenshine's Principles (dual coding icons) for teachers' use

Principle	Description	Icon
1	Rosenshine 1 – (Daily) review Start each lesson with a repetition of previous material. Regular repetition reinforces what was learned and leads to more spontaneous recall.	
2	Rosenshine 2 - New materials in small steps Present learning materials in small amounts. Accompany students with practice after each step.	
3	Rosenshine 3 - Ask questions (understand/assess) They connect the new learning material with previous knowledge and practise it.	
4	Rosenshine 4 - Provide models Pupils can focus on the steps to solve a problem	
5	Rosenshine 5 - Guide student practice The best teachers spend a lot of time supervising the practice/learning of new material.	
6	Rosenshine 6 - Check student understanding (understand/assess) By checking in between, pupils can learn the material with fewer mistakes	
7	Rosenshine 7 - Obtain high success rate Aim for the students to experience approximately 80% success in the exercises, questioning ...	
8	Rosenshine 8 - Scaffolds for difficult tasks The teacher provides temporary support that decreases as students become more competent.	
9	Rosenshine 9 - Independent practice Provide practice time in and out of the classroom so that the learned material can be automated.	
10	Rosenshine 10 – (Weekly and monthly) review Pupils need to practise intensively in order to automate the material. Not necessary for this key study.	

Icons based on [Rosenshine poster by Oliver Caviglioli](#)

Checking understanding

Step 1: Direct instruction / teacher facilitated stage

Step 2: Modelling / Scaffolding,

Step 3: Individual exploration

Step 4: Review - discussion

Step 5: Problem-solving

Step 6: Presentation/Assessment

How to guides

- Key areas of Digimap for Schools >
- About the maps >
- Navigating in Digimap for Schools >
- Search >
- Map selector >

- Overlays >
- View the compass >
- Measure distance and areas >
- Add text >
- Add markers >

Key areas of Digimap for Schools

There are three key areas of Digimap for Schools.

Map window

The map window is the largest area in Digimap for Schools, where you:

- View maps
- Select different maps
- Zoom in and out
- Pan around

Search places, coords, postcodes...

Digimap for Schools

Saved Maps

⚠ NOTE: All maps, their content and their titles, will be visible to everyone who logs in using your school or college account. If you have imported data, this will also be saved with the map. Please consider whether the information stored with and on the map is OK to share with the rest of your school community, which may include staff, pupils and parents.

Long-term memory:
Future learning schema

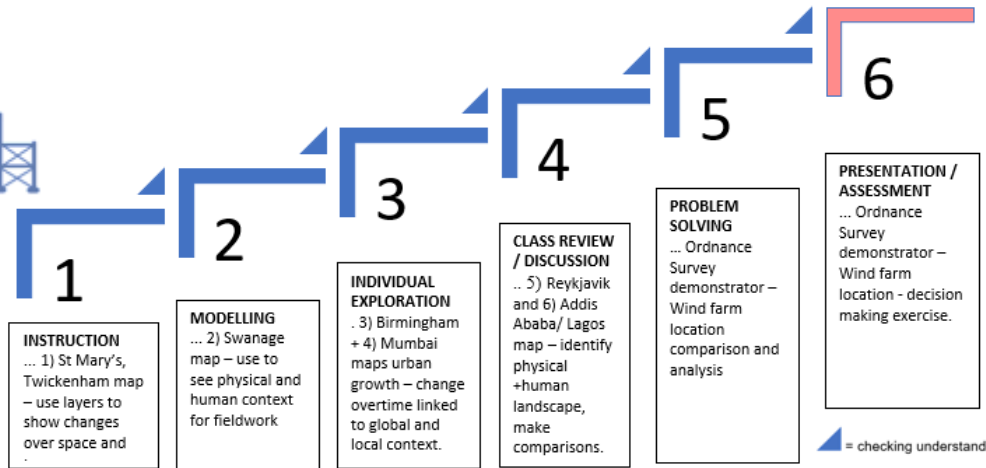

Digimap - example

- Locational Knowledge
- Age group 11-16 years

CASE STUDY: Place knowledge – using GIS maps.

Gi Pedagogy: Concept Cube

Title:	Working memory: Current learning schema
Write key concept here:	
1	GIS – map layers
2	Latitude and longitude
3	Urban growth
4	World Biomes

	Long-term memory: Prior learning schema
1	Distance
2	Grid reference
3	Map
4	Population density
5	Scale (on a map)
6	Tectonic plate margins
7	Tectonic plates
8	Urbanisation
9	Volcanoes

	Long-term memory: Future learning schema
1	Addis Ababa, Ethiopian Highlands
2	Birmingham urban growth
3	Global rainfall patterns
4	Global temperature change
5	Lagos natural vegetation
6	Mumbai population density
7	Reykjavik tectonic activity
8	Swanage Jurassic coast
9	Wind farm locations

Step	Identify a topic / story that is going to be told / explored using GIS	Other
	TEACHING WITH GIS	
	Location and place knowledge: spatial thinking through sequenced mapping with GIS	
	Curriculum context: Thinking geographically – using location and GIS layers to create a better sense of place.	
	Target age group: 11 – 16 years (KS3 + 4)	
LOs	Learning objectives	
	<p>[Ideas for Learning objective statements]</p> <ul style="list-style-type: none"> • Retrieve prior learning about layered maps and their purpose. • Describe and explain links between where places are in the world and the importance of relative location and characteristics of different places and global interdependence • Describe, explain and evaluate influence of location on case-studies as places. 	
	<p>SUSTAINABLE DEVELOPMENT GOALS</p>	
Res	Key resources and embedded hyperlinks if appropriate	
	<p>e.g. GIS resource; .pptx .csv .doc; video or audio clips</p> <p>https://digimapforschools.edina.ac.uk/roam/map/schools</p>	
	Individual exploration:	
	https://digimapforschools.edina.ac.uk/roam/map/schools

Example 4

- Wind Farm
- Age group 17-18 years

VIGNETTE - WIND ENERGY

Step	Identify a topic / story that is going to be told / explored using GIS	Other
	Teaching with GIS	
	Wind energy	
	Context / place in SoW: Sustainable development, energy transition (in K11-12 compulsory education topic)	
	Target age group: K11-12 = 17-18 y	100 min
LOs	Learning objectives <ul style="list-style-type: none"> Define alternative energy Describe evaluate the possible impact of <u>wind mills</u> Understand the nimby-syndrome Interpreting maps Explain Describe, explain and evaluate possible influences on this location and distribution. Link to SDGs. 	
Res	Key resources and embedded hyperlinks if appropriate <p>Ordinance Survey Demonstrators</p> <p>https://www.ordnancesurvey.co.uk/demos/logica/windfarm2.html</p>	

Ordinance Survey Demonstrators

Insurance Retail **Wind farm** Housing Change over time

Wind farm assessment

Regional view:

- Eastern England
- SSIs and nature reserves
- Civil airports with 30km buffer
- RAF bases with 30km buffer
- Windspeed
- Potential area of interest

District view:

- Aviation and natural restrictions
- Mast sites
- Pumping stations
- wind speeds
- Potential area of interest

Information

Next there are aviation restrictions whereby wind farms cannot be within 30km of an airport, in this case the civil aviation airports.

'GI-Pedagogy' Innovative Pedagogies for Teaching with GIS

Mon 7th November22
4 – 5pm

Rosenshine's Principles (dual coding icons) for teachers' use

Principle	Description	Icon
1	(Daily) review Start each lesson with a repetition of previous material. Regular repetition reinforces what was learned and leads to more spontaneous recall.	
2	New materials in small steps Present learning materials in small amounts. Accompany students with practice after each step.	
3	Ask questions (onderwijsleergesprek) They connect the new learning material with previous knowledge and practise it.	
4	Provide models Pupils can focus on the steps to solve a problem.	
5	Guide student practice The best teachers spend a lot of time supervising the practice/learning of new material.	
6	Check student understanding (onderwijsleergesprek) By checking in between, pupils can learn the material with fewer mistakes.	
7	Obtain high success rate Aim for the students to experience approximately 80% success in the exercises, questioning ...	
8	Scaffolds for difficult tasks The teacher provides temporary support that decreases as students become more competent.	
9	Independent practice Provide practice time in and out of the classroom so that the learned material can be automated.	
10	(Weekly and monthly) review Pupils need to practise intensively in order to automate the material. Not necessary for this key study.	

Icons based on [Rosenshine poster by Oliver Caviglioli](#)

Step 1: Direct instruction / teacher facilitated stage - this is where schema building begins. Present new material.

Step 2: Modelling / Scaffolding, with review and questioning – what data are needed?

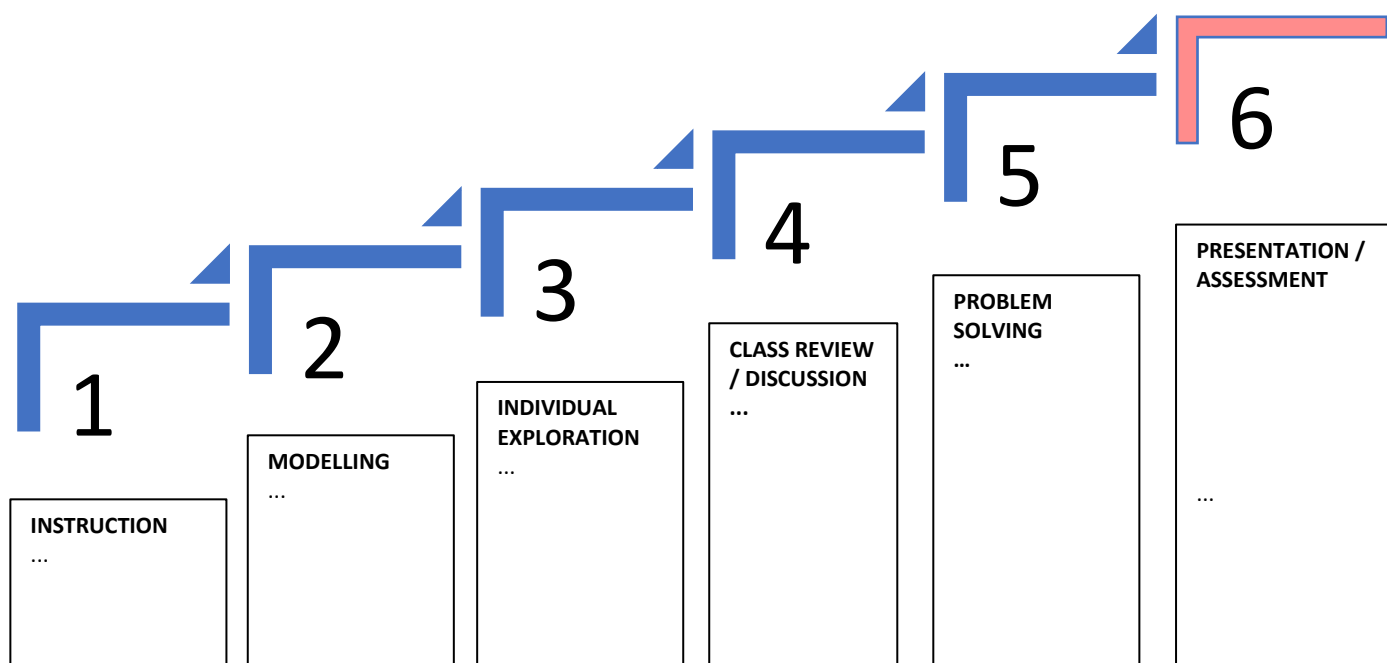

Step 3: Individual exploration

Step 4: Review - discussion

Step 5: Problem-solving

Step 6: Presentation/Assessment (Peer assessment possible too) and sharing of outcomes. This will also be the stage where students may feel secure enough to start their own exploration.

 = checking understanding

Working memory:
Current learning schema

Long-term memory:
Prior learning schema

Long-term memory:
Future learning
schema

Concepts Cube to

add: (see the ppt also and change this information with the cube after creating it)

1. **Blue table - Working memory: Current learning schema**

Write up to five key ideas for the lesson. As well as the main concept, add three or four other key ideas that will build towards the main concept. If you are NOT using a 4th additional concept then leave the row that starts with '4' blank.

2. **Green table - Long-term memory: Prior learning schema**

Add up to nine items from prior learning that should already be part of the schema in students' long-term memory.

3. **Red table - Long-term memory: Future learning schema**

Add up to nine items that will be taught in future learning that will become part of the schema in students' long-term memory.
